*Foundation Edition*

## WOOD COUNTY HOSPITAL'S 70<sup>TH</sup> ANNIVERSARY

### *Belongs to the Community*

With the support and financial backing of the community, Wood County Hospital opened its doors 70 years ago. Mr. Fred Uhlman, a local businessman, made the hospital a reality with a generous lead gift and challenged community members to donate as well.

The community continues to support the hospital through many forms of philanthropy, financial support, gifts-in-kind, volunteering and encouragement of our team of tireless healthcare workers. In 1987, Ruth and Rhea Keil both left generous gifts to Wood County Hospital in their wills. Mr. Bill Culbertson, Sr., Administrator at that time,

used these donations to establish the Wood County Hospital Foundation.

“Many other community members have followed in the footsteps of the Keil sisters by leaving large and small planned gifts to the Wood County Hospital Foundation. These gifts have enabled the Foundation to grow to ensure the legacy of medical excellence for our community,” said Cristy Walton, WCH Foundation executive director and vice president of development. “Philanthropy has truly been the infrastructure to the Hospital’s continued success.”

# Foundation Edition

**Cristy Walton**  
Vice President of  
Development  
Wood County Hospital

This special edition recognizes the support provided to the Wood County Hospital Foundation from our community. We're highlighting our very generous supporters who continue to step forward each year as well as those who provided so many in-kind donations through this difficult and unprecedented pandemic.

We are proud of our staff for rising to this unparalleled challenge and are grateful for our donors and the community for their unwavering support.

WCH is here for you in the moments that matter the most, and you continue to show that you are here for us. Your support is making an impact on health care for our community. Read further about a few of the Foundation's recent grants that allow us to assist the Hospital and our community by advancing healthcare in Wood County.

These are challenging times, but with your support we will come through even stronger. *Thank you for Depending on Us!*

# Celebrating Generosity

## IN MANY WAYS

Over this past year, our dedicated health team of over 900 staff worked through the COVID-19 pandemic, facing a situation most have never been a part of in the past. Our community responded with more generosity, thoughtfulness and support than we had ever encountered. Meals and snacks were delivered regularly by local restaurants and organizations. Many community members made homemade desserts while others worked their sewing machines to provide thousands of homemade masks for patients and visitors when supplies

ran low. Caring individuals provided letters and cards, and even organized a parade of emergency responders that circled the hospital sharing support and camaraderie.

With profound gratitude, we would like to acknowledge the extraordinary community members that rallied around our healthcare heroes and the hundreds who found creative and meaningful ways to help. The dedication you have shown our community hospital and our healthcare workers is inspiring.

# FOUNDATION SUPPORTS NURSING SIMULATION LAB AT BGSU

## PRESIDENT'S Q&A

*Stan Korducki, FACHE, has served as president and chief executive officer of Wood County Hospital for the past 20 years.*

### **Why is philanthropy so important?**

As a community hospital, we are committed to providing necessary care to all community members who knock on our door regardless of their ability to pay. Even today, many people lack health insurance coverage, or have plans that do not cover the total cost of care. While we take pride in being good stewards of our resources and operating efficiently, financing 21st century hospital care is increasingly more expensive. Philanthropy provides us with additional capital support to invest in keeping up our facilities, equipment, and staff. At Wood County Hospital we have been blessed with excellent support from the community through the Foundation. For example, philanthropic support has enabled us to acquire the technology to provide state-of-the-art-radiation therapy care at our Maurer Cancer Care Center. With this help, Wood County Hospital is able to provide excellent cancer care here in Wood county; and keep quality care local.

### **What is the most pressing issue facing independent hospitals today?**

Health care is extremely dynamic. The science of medicine is continuously evolving creating new approaches to diagnosis and treatment. Similarly, as a society the expectations for health care delivery have never been higher. Our challenge is always to match the pace of change with people, programs and services needed to provide care in the best way. This requires us to have access to committed and talented providers, new technologies, pharmaceuticals and much more. We have been successful so far in doing this, but it is an ongoing challenge.

### **If you could let people know just one thing about WCH, what would it be?**

From a service perspective, I like to say that we're a "big hospital that's small in size." We have the physicians, staff and technologies to provide about 80% of the services that one can receive in a large tertiary medical center. But we are able to offer high level care with compassion, personal touch and great service due to our size. Our care givers bring a family feel to their work with patients. This is true throughout our hospital whether a patient is here for a new baby, cancer treatment, knee surgery or basic lab work. Patients really can always, depend on us.

The WCH Foundation Board of Trustees approved a grant of \$100,000 to support a new simulation lab inside the new BGSU School of Nursing. Currently under construction, the lab will be located in the former College of Business annex, now known as Central Hall.

The primary purpose of the simulation lab is to support nursing education and ongoing professional development of practicing nurses in a lab environment that encourages cross-discipline collaboration. This collaboration has been proven to be a best practice and an effective way to expand knowledge and growth in the field.

The simulation lab will include sophisticated high-frequency manikins that simulate high-risk medical scenarios in situations like critical and emergency care, obstetrics and pediatrics.

The facility will also support the educational needs of students and professionals in other related healthcare disciplines such as communication disorders, dietetics, exercise science and athletic training.

"This represents a major initiative to improve healthcare in Ohio," said Stan Korducki, president of Wood County Hospital. "Never has there been more demand for exceptional, well-trained nurses."

The WCH Foundation is proud to support this project and looks forward to welcoming the first incoming nursing class this August.

# WCH GUILD HOLDS “VIRTUAL” EVENT

Since 1954, the Wood County Hospital Guild has been an important partner in fundraising efforts by developing events that drive outstanding support from community members. These efforts have had a significant impact on providing state-of-the-art technology for patient services.

In the midst of a pandemic, the Guild leadership still found a way to host the Hops & Vines event last year. “Although

virtual, our community certainly showed up in a significant way for the event,” stated Laurie Newlove, director of volunteer services at WCH. “Over \$35,000 was raised to support the Wood County Hospital Guild’s commitment to purchase new equipment for our Radiology and Rehabilitation departments. Thank you so much to all our donors and wonderful volunteers who continue to support our efforts to provide our community with outstanding health care and the latest technology.”

# ADVANCED TECHNOLOGY, THE FOUNDATION OF CANCER CARE AT WOOD COUNTY

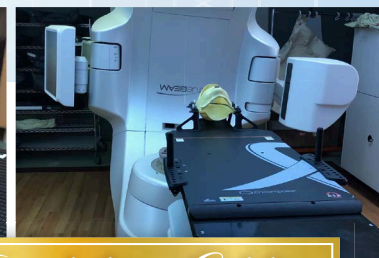

Patients who want the convenience of being treated closer to their home and not require them to go to a larger city, can get excellent care and access to the highest level of technology at the Maurer Family Cancer Care Center at Wood County Hospital.

With the support of the WCH Foundation, the Maurer Family Cancer Care Center is now offering stereotactic radiosurgery. This radiosurgery procedure allows for precise radiation treatment of small lesions in the brain without surgically opening the brain is now delivered in a single visit is now available. This procedure eliminates a very invasive brain surgery and many weeks of conventional radiation therapy treatments. The patient experiences fewer side effects than surgery and conventional radiation therapy and has no pain during the treatment.

“When looking to find high quality cancer treatment close to home, the Maurer Family Cancer Care Center not only has these technologies but a team of passionate professionals dedicated to

making a difference for those living with and affected by cancer.” stated Dr. Dhaval Parikh, medical director of radiation oncology. “Advancing cancer care requires more than just science. It’s a collective effort driven by a team dedicated to making a difference for our patients that we’re seeing on a daily basis for an extended period of time. This is an opportunity that patients can be a part of at our community hospital.”

Support from donations has allowed us to continue to upgrade to new technologies as they become available. Another important fundraising piece is our Patient Care Fund that was established to assist patients with non-medical support while under treatment. This traditionally consists of rent, utilities, transportation and other non-clinical costs. This fund can be critical in assuring all patients are able to get to their appointments and have the necessary resources for their treatments to be effective. If you are interested in helping, the Annual Fund is one way to give back (designate your gift to the Patient Care Fund). You can contact the Foundation at 419-373-7627 or visit our website.

*Foundation Edition*

# WERE YOU BORN AT WOOD COUNTY HOSPITAL?

## Family Birthing Center

Many residents have taken the opportunity to add the names of their children, grandchildren or even their own name to the footprints display in the Wood County Hospital Family Birthing Center. The footprints are \$50 each and help fund Family Birthing Center projects that sustain excellence in the department. Each New Year, the Foundation honors the first baby with a complimentary footprint.

If you are trying to decide on the perfect gift for Mother's Day, Father's Day, or a birthday, look no further! In addition to a gift that will last, you will also be supporting future mothers that deliver at the hospital.

For more information, please contact the Wood County Hospital Foundation at 419-373-7627 or go to the Foundation page on [www.woodcountyhospital.org](http://www.woodcountyhospital.org) to print the form.

# DESHLER DOCTOR PROGRAM

## PROVIDES MAJOR GIFT OF SUPPORT

Over 40 years ago, the Deshler Doctor Program Trust Fund was established by Deshler area residents as a revolving fund for loans to medical facilities and students who would commit to practicing medicine in the Deshler community. Wood County Hospital has a long history of working with the Deshler community to provide primary care. Twenty years ago the hospital partnered with Dr. Robert Blough to build a new clinic to serve Deshler.

In 2020, the Deshler Doctors Program Committee decided to terminate the trust and distribute the remaining funds to medical service providers who have served the Deshler area.

“Our community is so very thankful to Wood County

Hospital for the ongoing support of providing a physician and other healthcare providers in our community,” stated John Sunderman, Secretary of the Deshler Doctor Program’s Trust Fund. “We are happy to provide \$100,000 to assist the Wood County Hospital Foundation in their continued efforts to provide quality medical service to Deshler and Northwest Ohio.”

Mr. Sunderman also praised Wood County Hospital’s healthcare providers. “Dr. Brad Everly, who recently joined Deshler Family Practice, is another outstanding physician, and we are very appreciative of the quality of care that WCH provides for our community.”

## WCH & BG CHAMBER BLOOD ANALYSIS RETURNS

We are pleased to announce that the Blood Analysis event will return on Saturday, April 24th. This is the 16th year the Wood County Hospital has worked with the BG Chamber to provide discounted lab work to community members. All proceeds provide scholarships for local high school students through the WCH Foundation and the BG Chamber Scholarship Funds.

In 2020, \$1,000 scholarships from the WCH Foundation were granted to Hailey Perez and Faith Zhang from BG High School and Raegen Stewart from Eastwood. All of these outstanding students will be pursuing an education in the healthcare field.

If you’d like more information about this program, or to schedule an appointment, please contact the BG Chamber at 419.353.7945. For those individuals that currently had

an appointment last year and did not request a refund, you will be contacted by the BG Chamber office to confirm your appointment time.

## FOUNDATION GRANT PROVIDED FOR

# NEW PULMONARY & CARDIAC REHABILITATION SPACE

Funding has been provided by the Wood County Hospital Foundation for the relocation and merging of Pulmonary Rehabilitation with Cardiac Rehabilitation Program on the third floor of the hospital. “This transition will improve the patients’ experience and provide better access,” stated Jeanette DiLucia, director of respiratory care at Wood County Hospital.

The new space boasts an open floor plan, new equipment with a walking track, cool-down area and an education classroom. The combined area will also allow for future

growth for both programs. There will be an opportunity to develop and implement new Peripheral Artery Disease programs.

Construction on the space has begun and the first phase of the project will be available for patients the first part of May, with the second phase in June. “This project is one that we have been waiting awhile to accomplish,” said DiLucia, and we are fortunate that the hospital has the Foundation as a resource to assist with additional patient care projects like this one. The new space will be a benefit for all the patients we serve.”

*Continued from cover.*

## WCH 70<sup>TH</sup> ANNIVERSARY BELONGS TO THE COMMUNITY

Support by community members set us apart from other healthcare facilities. The patients and the community we serve help to inspire the Wood County Hospital staff to provide high quality, personalized healthcare every day.

To ensure that we can continue to meet those goals for generations, we’ve established the **1951 Legacy Society at the Wood County Hospital Foundation** during the hospital’s 70th anniversary. **By committing to a planned gift, you’re also making a gift to our community.** Regardless of the size of your legacy gift, it can make a large impact over time.

“Some people feel they must choose between leaving a gift to their family or a charity,” shared Ms. Walton. “You can do both, and some charitable gifts may actually save your family money by decreasing inheritance taxes. More importantly, you are setting an example of the importance of helping others and those causes that are most important to you.”

A legacy gift, regardless of the size, is an investment in your community and ensures that high-quality, convenient healthcare is locally available for generations to come. Each Legacy gift will be recognized in the **1951 Legacy Society**.

Every gift to the Wood County Hospital Foundation guarantees that essential healthcare services are sustained to serve families today and for generations to come.

# Thank You to Our Donors

The Wood County Hospital Foundation is proud to recognize its generous supporters whose philanthropy enables Wood County Hospital to continue to provide exceptional, compassionate, patient-centered care to our community and beyond. We deeply thank you for your generosity!
